

Classic sock – SNEAKER length

Put the design here:

Size: 11 (39–42)

Project dimensions / proportions are:
168 x 250 pixels

The cuff is additionally:
168 x 40 pixels

<input type="text"/>	kod/code 1	<input type="text"/>	kod/code 4
<input type="text"/>	kod/code 2	<input type="text"/>	kod/code 5
<input type="text"/>	kod/code 3	<input type="text"/>	kod/code 6

Choose every square and assign color which matches one of the colors used in project. You can choose and use only 6 colors, including background color and toes, heel and cuff. Enter the yarn code from our catalog, which should be used to sew this color.

Blue Color - Cuff, Heel, Toes. We can put simple objects in the cuff, like simple text, simple shapes. No logos. Heel and toes must be a solid color, no pattern. Everything interfering with the heel will get split into two pieces.

Green Color - the bottom of the foot. The pattern must connect in the left and right side of the template, as then it will connect on the bottom. No seam visible.

Pink Color - the front part of the foot.

Gray color - the back of the leg. The pattern must connect in the left and right side of the template, as then it will connect on the back. No seam visible.

- export as PDF
- only vector graphics
- white counts as a color
- only solid colors (no gradients, no shaders)
- smallest possible text - 5mm (5 pixels high) - small letters.
- prioritize straight text over cursive
- curvy shapes might be simplified
- the design is verified and might need to be adapted to the technological possibilities of socks production
